

## List of Late-Breaking Posters

No.	Title	Authors	Page
<b>P39</b>	Production of Laser Microbeams by Tapered Glass Capillaries	Yuya ITO, Wei-Guo JIN, Kyohei KATOH, Tatsuya MINOWA, Tokihiro IKEDA	115
<b>P40</b>	Cell Inactivation by OH Radicals is Important in High LET Particles	Ryoichi HIRAYAMA, Maki OBARA, Akiko UZAWA, Toshiyuki SHIRAI, Yoshiya FURUSAWA	116
<b>P41</b>	Heavy ion irradiation-induced cell cycle arrest in multinuclear silkworm egg having non-damaged and damaged nuclei	Daisuke Ueda, Tomoo Funayama, Yuichiro Yokota, Michiyo Suzuki, Tetsuya Sakashita, Yasuhiko Kobayashi, Koji Shirai	117
<b>P42</b>	Radiation induced biological response in vivo and in vitro studied with microbeam irradiation facility	Xiaoyin Guo, Qingqing Li, Po Bian, Lijun Wu	118
<b>P43</b>	Development of ASIPP single particle proton microbeam facility	Hang Yuan, Lianyun Chen, Furu Zhan, Lijun Wu	119
<b>P44</b>	Need for new tools to understand the impact of nanoparticles on radiation enhancement effects	E. Porcel, S. Lacombe	120
<b>P45</b>	Single Cell Irradiation System at the Wakasa Wan Energy Research Center	Masanori HATASHITA, Keiichi TAKAGI, Keisuke YASUDA, Satoshi HATORI	121
<b>P46</b>	The effects of ionizing radiation on the plasma membrane of cells	Luis Fernando Spitta	-
<b>P47</b>	The Application of Integrated Stochastic Spatial Temporal (ISST) Model in Radiation Risk Assessment: A case study on radiation induced bystander effect	Ruirui Liu, Higley Kathryn	-
